Respected Sir,

I Kushi Tiwari student of TY Bsc BT is writing this letter to inform you that I could not attend the Sem V Applied Component practical exam scheduled on 11/10/23 & 12/10/23. due to a sudden bout of illness. I was incapacitated with severe stomach pain and after medical test through sonography got a confirmation that I'm suffering from a kidney stone (renal calculus) of size 3.7mm.

For verification I have attached the medical certificate provided by Dr. Ashok Patil. Sorry for the inconvenience caused. I assure you of my commitment to my studies.

Thanking You.

Subject: Application for Submission of Medical Documents of Missing Examination

Dear MVLU College Administration,

I hope the letter finds you well. I am writing to request permission to submit my medical documents for the three papers I missed at the beginning of the semester.

Due to a sudden and unforeseen medical condition, I was unable to attend the exams for Data Structure, Linear Algebra and JAVA. The medical condition required immediate attention and subsequently hindered my ability to participate in these examinations. I have since received medical treatment and have been advised to rest and recover.

I would like to assure you that such a situation will not recur in the future, and I am committed to catching up on the missed coursework promptly.

Thankyou for your understanding and consideration. I appreciate your support in the matter and look forward to your guidance regarding this situation.

 Date of Admission: 26.4.23

Age: 19 years
 Indoor No: 342/23

Sex: Male

Date of Discharge: 11.5.23

Diagnosis: Transfusion dependent thalassemia with severe cardiac iron overload admitted for IV Desferrioxamin.

History:

19 years old male child known case of transfusion dependent thalassemia, 1st by birth order, born out of non consanguinous marriage, belonging to Hindu community, resident of Nalasopara, hailing from Uttar Pradesh. He required 1st transfusion at Andheri Nursing home at the age of 4 months, when he presented with febrile illness. 1 month later he required another PRC transfusion at Nair Hospital, where he was diagnosed with B-Thalassemia Major. Currently he is taking transfusion at Nair Hospital. Initially requiring 1 bag every 15 days, currently requires 1 bag/month. Pre transfusion Hb 7-8gm%. Last transfusion taken on 21/2/23 with Hb-4 1gm%. He was put on Thalidomide trial from 01/1/22, Randomized to group(A). Thalidomide was stopped on 02/03/23 i/v/o cytopenias. And was removed from the trial i/v/o poor compliance.

Chelation history- He received no chelation till the age of 9years. Started taking Desirox @31mkd from 2013. Currently taking Desirox 1500mg/day @40.9mkd

Course:

Iron Overload-Patient is admitted at CTC for IV deferoxamine therapy. His last ferritin level was 2500 (Jan 25). His MRI done on 22/11/22 showed severe iron overload over Heart/Liver/Pancreas, HD Echo done was normal. On examination patient was afebrile and vitally stable. Per abdomen examination was soft & non tender, Liver and Spleen both were non palpable. Rest Systemic examinations were normal. He was admitted and started on Inj Desferrioxamin as continuous infusion under cardiac monitoring initially from 27mkd which was then gradually increased to 41 mkd. He received 3 PRC transfusions during his stay to keep pretransfusion Hb of 9gm%. He tolerated the IV Desferrioxamin infusion well for all 21 days with no complaints. His Desirox was stopped once Kelfer was available. Kelfer was started @75mkd, which was later increased to @82mkd

Endocrine review done-reports suggestive of iFBS with normal C-peptide, adv to continue calcium and vitamin D3 and follow up in endocrine opd in July 23.

Currently, patient has completed 21 days of IV Desferral, is maintaining hemoglobin and haemodynamically stable. He has no other complaints, hence is being discharged.

Subject:- Request for Re-Examination due to Medical Reasons.

Respected Sir,

I am Gopal Vishwakarma, currently enrolled as a second-year Computer science student at your college. Unfortunately, during the semester 4 examination period, I encountered an unexpected health issue. As a result, I was unable to attend the remaining five examinations. It lead to my hospitalization from March 27th to April 1st.

I kindly request your assistance in arranging a re-examination for the missed subjects. Enclosed, please find the necessary medical documentation supporting my absence during the examination period.

Thank you for your understanding and consideration. I eagerly await your response and guidance on the next steps to proceed with the re-examination process.

Yours sincerely,
Gopal Vishwakarma (S121)

SONOGRAPHY OF ABDOMEN AND PELVIS.

Real time, B mode, gray scale sonography of the abdominopelvic organs was performed.

LIVER : It is normal in size, shape and has smooth margins. It is uniformly isoechoic. The portobiliary radicles are normal in distribution and calibre. There is no solid or cystic mass lesion or calcification. **PORTAL VEIN** is normal in calibre.

GALL BLADDER : is well distended and has uniformly thin and regular walls. There is no mass lesion or calculus. **COMMON BILE DUCT** : is normal in calibre.

PANCREAS : is normal in size, shape, contour and echotexture. No solid or cystic mass lesion is noted.

KIDNEYS : are normal in size and have smooth margins. The right kidney measures 10.2 x 3.7 cm. The left measures 11.2 x 5.0 cm. Cortical echotexture is normal. No calculus or hydronephrosis is seen.

SPLEEN : is normal in size and shape. The echotexture is homogenous without any focal lesion.

RETROPERITONEUM : Aorta and IVC are normal.

BOTH PSOAS SHADOWS : are normal.

URINARY BLADDER : The urinary bladder is well distended. The walls are normal in thickness. There is no calculus.

PROSTATE : The prostate gland shows well defined and smooth margins. No calcification is seen. Its weight is 8.8 gms.

The ascending colon and part of caecum shows thickened and hyperechoic mucosa and submucosal layers. The surrounding mesentery is hyperechoic.

Few variable sized hypoechoic lymph nodes are seen in right lumbar & right iliac fossa region, largest measures 11 mm in short axis.

Minimal free-fluid is seen in pelvic region.

CONCLUSION :

The abdominal organs appear normal.

The ascending colon and part of caecum shows thickened and hyperechoic mucosa and submucosal layers. The surrounding mesentery is hyperechoic.

CT. SCAN OF ABDOMEN AND PELVIS WITH CONTRAST

Protocol:

Plain and contrast C.T study of the abdomen is performed after administration of oral and IV contrast medium. 1mm. serial contiguous sections are obtained from domes of diaphragm up to the pubic symphysis.

Observation:

Mild hepatosplenomegaly is noted. The liver and spleen otherwise appear normal and do not show any focal abnormality. The intrahepatic biliary and portal venous radicals appear normal. The portal vein is normal.

Gall bladder is normal and reveal no intrinsic abnormality. Common bile duct is not dilated. The pancreas is normal in size, shape and enhancement pattern. No focal area of altered attenuation or mass lesion is detected. Both adrenals are normal.

Both kidneys are normal in size, shape and position. No focal area of altered attenuation or mass lesion is detected. Both ureters are normal in course and caliber.

The urinary bladder is well distended. No evidence of vesicle mass / polyp seen.

Visualised prostate and seminal vesicles appear normal.

The abdominal and pelvic vasculature is normal.

Reactive right iliac fossa and mesenteric lymph nodes are noted.

There is no evidence of ascites.

Appendix is visualized and appears normal (6.6 mm). Visualized bowel otherwise appears normal.

CONCLUSION: CT findings show;

Mild Hepato-splenomegaly is noted.

Reactive right iliac fossa and mesenteric lymph nodes are noted.

No other significant abnormality is detected.

Please note that imaging conclusions need to be correlated with clinical findings & other investigation for final diagnosis.
